

*/\*To check how much of each product is held by all of the retailers, they can adjust their supplies of the products to the retailers based on this information  
If a product is about to run out, that means that the product is very popular for that specific retailer so perhaps more of those products can be supplied there and similar products can be introduced\*/*

```
CREATE VIEW inventoryofretailers AS
SELECT products.*, retailers.*
FROM PRODUCTS INNER JOIN INVENTORY ON PRODUCTS.PRODUCTID = INVENTORY.PRODUCTID INNER JOIN RETAILERS ON INVENTORY.RETAILERID = RETAILERS.RETAILERID;
```
